

1952

Lorandi Villo

Storia *History*

Lorandi Silos

Era il 1952 quando ad opera di Giuseppe Lorandi ebbe inizio la nostra azienda. Nell'industria bresciana della ricostruzione ci ritagliammo uno spazio importante nel campo agricolo, enologico ed anche chimico fornendo ad importanti aziende locali cisterne in acciaio inox, coclee e macchinari, alcuni brevettati proprio dal signor Giuseppe. Con il passare degli anni la crescita coincise con un'espansione fuori provincia, partecipando a fiere italiane furono acquisiti clienti in tutta la penisola e sempre più ci fu una specializzazione nello stoccaggio e movimentazione di prodotti polverosi e granulari diventando partner tecnologici di aziende alimentari, agricole e chimiche di assoluto rilievo, fornendo anche macchinari speciali sperimentali industrializzati poi con il passare degli anni. Ai giorni nostri ci sentiamo molto legati al nostro territorio, ma i nostri tecnici sono sempre in volo da un capo all'altro del mondo a collaudare nuovi impianti per le maggiori aziende del pianeta che ci onorano della loro fiducia come specialisti in stoccaggio, trasporto e dosaggio. Dal 1952 ad oggi siamo cresciuti, ma è sempre la stessa famiglia che con grande impegno e cura segue con passione ogni cliente, che sa ascoltare e realizzare con lo sguardo sempre rivolto al futuro.

It was 1952 when, thank to Giuseppe Lorandi, our company had beginning. In the reconstruction industry of Brescia we cut an important space in the agricultural, wine and also chemical field, supplying to important local companies silos in stainless steel, screws and machinery, some patent to you just from Mr. Giuseppe. With passing of the years the increase coincided with an expansion outside Brescia, participating to Italian fairs was acquired customers in all the peninsula and more and more there was a specialization in the charge and handle of dust and granular products becoming technological partner of alimentary, agricultural and chemistries companies of absolute relief, supplying also special sperimental machineries industrializes then with passing of the years. Nowadays we feel many legacies to our territory, but our technicians are always in flight from a head to the other of the world to test new systems for the greater companies of the planet that honor us of their confidence like charging, transport and dosage specialists. From 1952 today we have grown, but it is always the same family that with great engagement and cure follows with passion every customer, and listen and realize always with the look turned to the future.
